LONG-LINE

---

Long-line tube system with watertight sections. The use of a long-line floating tube considerably reduces dynamic load, compared to traditional buoy long-lines. It avoids sinking problems.

**Long-line tube system with watertight sections. The use of a long-line floating tube considerably reduces dynamic load, compared to traditional buoy long-lines. It avoids sinking problems.**

Long line de tubo continuo con secciones estancas. El uso de long lines de tubo flotador reduce considerablemente las cargas dinámicas respecto a los long lines tradicionales de boyas. Evita los problemas por hundimiento.
